To: Creative Direction & Environment Team | Fivestone Studios & Sourcing Unicorns
Position: 3D Unity Generalist / Visual Artist (Senior Environment Artist)

Dear Fivestone Studios & Sourcing Unicorns Creative Team,

I am writing to express my enthusiasm for the **3D Unity Generalist / Visual Artist** role with **Fivestone Studios**. Having built and visually refined interactive 3D worlds across 50+ Unity titles—ranging from immersive spatial simulations and stylized experiential installations to real-time interactive showcases—I thrive on transforming conceptual creative direction into visually striking, cohesive 3D environments directly within Unity.

I am fully synchronized with US business hours and bring a versatile generalist toolkit that bridges 3D asset creation, environment layout, lighting, and real-time visual effects:

- **Unity Scene Layout & Spatial Composition:** Hands-on mastery assembling, dressing, and lighting stylized 3D environments in Unity. I apply core principles of visual storytelling, depth layering, focal hierarchy, silhouette clarity, and color harmony to guide the viewer's eye seamlessly.
- **End-to-End 3D Generalist Workflow:** Skilled in Blender for modeling, UV unwrapping, stylized texturing, and modular kitbashing. I ensure all assets adhere strictly to real-time performance constraints, clean draw call hierarchies, and optimized geometry metrics.
- **Particle Systems & Light VFX:** Proficient in creating ambient environmental VFX using Unity's Particle System (Shuriken) and lightweight shader effects—crafting floating atmospheric dust, interactive energy motes, stylized fluid flows, and glowing navigational cues.
- **Object Animation & Environmental Dynamics:** Direct experience animating scene elements using Unity Animator and Timeline, creating natural mechanical rotations, floating interactive props, kinetic stage elements, and camera transitions.

Fivestone's dedication to bold experiential storytelling, teamwork without ego, and creative courage aligns perfectly with how I work. Whether setting up initial greybox compositions or applying final post-processing, lightbakes, and particle polish, I take end-to-end ownership of environment quality.

I would love the opportunity to walk through my portfolio and discuss how my Unity environment art and 3D generalist skills can support Fivestone Studios' upcoming immersive productions. Thank you for your time and consideration.

Warm regards,

Anniket Prajapati
3D Unity Generalist & Visual Artist
