Dear Hitapps Hiring Team,

I am writing to express my strong enthusiasm for the **Unity Developer** position at Hitapps. Having delivered **50+ interactive game and mobile titles** across Unity, C#, and real-time networking, I have great admiration for Hitapps' track record dominating the mobile puzzle genre with chart-topping titles like *Solitaire Associations*, *Figgerits*, and *Cross Logic* (200M+ downloads).

Throughout my career, I have specialized in architecting modular, high-performance mobile game codebases designed for aggressive scaling, rapid LiveOps iteration, and zero-crash stability. Here is how my engineering background aligns directly with Hitapps' technical priorities:

- **Modular C# & Systems Architecture:** Deep adherence to SOLID principles, dependency injection, and clean state machine design. Experienced in building reusable game logic systems that allow new puzzle mechanics and levels to be deployed quickly without regressions.
- **SDK Integration & Monetization:** Extensive hands-on experience integrating key third-party SDKs—including Firebase (Auth, Analytics, Realtime DB, Remote Config), AdMob, AppLovin MAX, Unity Ads, and custom analytics telemetry pipelines.
- **Mobile Performance Profiling & Optimization:** Proven track record maintaining 60+ FPS on low-end Android and iOS devices. Expert in Unity Profiler and Memory Profiler, draw call batching (Sprite Atlases, SRP Batcher), object pooling to eliminate GC allocations, and dynamic texture compression.
- **Dynamic UI/UX & Responsive Layouts:** Skilled in designing slick, tactile UI architectures using Unity UI (uGUI) and UI Toolkit, complete with micro-interactions, responsive aspect-ratio anchors, tweened transitions, and satisfying particle VFX.
- **LiveOps & Client-Server Connectivity:** Experienced with client-server interactions, JSON/REST API endpoints, cloud save synchronization, and dynamic content delivery for continuous LiveOps events.

I thrive in fast-paced, autonomous environments where creative initiative and engineering excellence go hand-in-hand. I would be thrilled to bring my engineering rigor and passion for mobile puzzle game feel to the talented team at Hitapps.

Thank you for your time and consideration.

Warm regards,
Anniket
