Application for Staff Hero Designer (Character, Combat, Traversal & 3Cs)

Dear Insomniac Games Design Team,

I am writing with immense enthusiasm to apply for the **Staff Hero Designer** position at Insomniac Games. Insomniac defines the pinnacle of character fluidity, traversal mastery, and expressive combat—from the kinetic joy of swinging through Marvel's New York to the tight, responsive weaponry of *Ratchet & Clank*. As a game designer and gameplay programmer with over **50+ shipped titles** and **35+ high-precision VR experiences**, I have dedicated my career to mastering the 3Cs (Character, Controls, Camera) and delivering ecstatic player game feel.

My technical design background directly aligns with Insomniac's hero design expectations:

- **Core 3Cs Mastery & Kinetic Game Feel:** Architected highly responsive player controllers, fluid locomotion systems, multi-state traversal (wall-running, dynamic vaulting, grappling, air dashes), and intelligent camera tracking algorithms that preserve spatial awareness and eliminate player disorientation during high-speed action.
- **Combat Mechanics & Tactile Responsiveness:** Designed modular combat frameworks featuring custom frame-data tuning, hitstop/freeze-frames, input buffering, combo trees, reactive hit reactions, screen shake profiles, and dynamic audio-visual feedback that make every strike, parry, and ability feel punchy and decisive.
- **Rapid Prototyping to Production Implementation:** Deep proficiency scripting gameplay mechanics from scratch, greyboxing encounters, and building tuning tools that enable rapid iteration between gameplay programmers, animators, and VFX artists.
- **Cross-Disciplinary Pod Leadership:** Extensive history collaborating with animation teams on blend trees and root-motion transitions, partnering with VFX artists to synchronize particle telegraphs with active hitbox windows, and mentoring fellow designers in system documentation and gameplay balance.

I would be thrilled to bring my passion for heroic traversal, deep combat mechanics, and relentless polish to Insomniac's upcoming projects. You can explore my design breakdowns, playable mechanics

demonstrations, and shipped titles at **https://portfolio-web-pi-inky.vercel.app/**.

Sincerely,
