Design Leadership & Hiring Team
Insomniac Games / PlayStation Studios

Application for Lead Systems Designer (Gameplay Systems, Progression & Technical Architecture)

Dear Insomniac Games Design Leadership,

I am writing to express my enthusiastic interest in the **Lead Systems Designer** position at Insomniac Games. Insomniac's storied reputation for elegant progression loops, tightly balanced mechanics, and deeply satisfying gameplay systems is unmatched in the industry. With a proven track record delivering **50+ commercial game titles** and **35+ high-fidelity VR experiences**, I specialize in architecting extensible gameplay frameworks, mathematical progression models, and mentoring multidisciplinary design teams.

My technical leadership and systems design background includes:

- **Architecting Interconnected Game Systems:** Designed and tuned deep progression frameworks, ability unlock matrices, equipment scaling models, and player economy systems that provide meaningful choices while maintaining game balance across long play sessions.
- **Data-Driven Design & Rapid Prototyping:** Built flexible, modular frameworks in modern game engines that decouple logic from content data, enabling systems designers to adjust balancing tables and test emergent mechanics without waiting on engine recompiles.
- **Design Leadership & Team Mentorship:** Seasoned in guiding design pods through milestone planning, conducting rigorous design reviews, writing comprehensive GDDs and Confluence documentation, and coaching designers to think critically about player psychology and edge cases.
- **Cross-Disciplinary Bridge:** Proven ability to speak the language of engineering, art, UI/UX, and production—ensuring complex systems integrate cleanly into UI flows and production schedules without accruing technical debt.

I welcome the opportunity to bring my passion for deep, elegant systems design and team leadership to Insomniac's world-class projects. You can review my design documentation, technical breakdowns, and shipped games at **https://portfolio-web-pi-inky.vercel.app/**.

Sincerely,

Anniket Prajapati
