Hiring Team — Level Design
Mob Entertainment (Creators of *Poppy Playtime*)

Application for Contract Senior Level Designer (Environmental Storytelling, Tension Pacing & Level Layouts)

Dear Mob Entertainment Hiring Team,

I am writing to express my enthusiastic interest in the **Contract Senior Level Designer** position at Mob Entertainment. The *Poppy Playtime* series is a masterclass in atmospheric dread, environmental puzzle pacing, and unforgettable spatial set pieces. As a game designer and developer with over **50+ commercial game titles** and **35+ immersive VR experiences**, I would be thrilled to bring my passion for tension-building level architecture and player psychology to your design team.

My background bridges the creative and technical pillars of first-person spatial design:

- **Blockout to Final Polish Pipeline:** Extensive experience greyboxing high-tension layouts, choreographing sightlines, controlling player focal points, and integrating subtle environmental cues that guide players naturally without immersion-breaking friction.
- **Tension Curves & Environmental Puzzles:** Proven ability to design pacing loops that alternate between intense pursuit sequences, quiet exploration, and intuitive spatial puzzles—a methodology honed across dozens of titles requiring laser-focused player orientation and suspense.
- **Technical Design & Rapid Scripting:** Highly proficient with modern game engine tools, visual scripting, trigger volumes, event dispatching, and dynamic level streaming—allowing me to prototype complex interactive encounters quickly and deliver production-ready blockouts to art and engineering.
- **Iterative Playtesting & Mentorship:** Seasoned in organizing structured playtests, synthesizing telemetry and player feedback, adjusting collision and traversal mechanics, and mentoring junior designers on spatial storytelling.

I am excited by the prospect of crafting chilling, memorable levels for Mob Entertainment's millions of passionate fans worldwide. My complete portfolio, interactive mechanics demonstrations, and shipped project breakdowns are accessible at **https://portfolio-web-pi-inky.vercel.app/**.

Sincerely,

Anniket Prajapati
