Hiring Team — Graphics & Rendering
Mob Entertainment (Creators of *Poppy Playtime*)

Application for Senior Rendering Engineer (Real-Time Graphics, Shaders & Pipeline Optimization)

Dear Mob Entertainment Hiring Team,

I am writing to express my strong enthusiasm for the **Senior Rendering Engineer** role at Mob Entertainment. The *Poppy Playtime* franchise has demonstrated how masterful real-time lighting, atmospheric tension, and visual fidelity can captivate hundreds of millions of players worldwide. I would love to bring my deep background in real-time graphics pipelines, custom HLSL shader authoring, and extreme framerate optimization to your rendering team.

Over the course of developing **50+ commercial game titles** and **35+ high-fidelity VR experiences locked at 90+ FPS**, I have specialized in the mathematical and technical intricacies of real-time computer graphics:

- **Custom Shader Development & HLSL/GLSL Mastery:** Authored specialized compute and vertex/fragment shaders for stylized and photorealistic surfaces, screen-space effects, volumetric fog, dynamic lighting, and custom post-processing passes.
- **Rigorous GPU/CPU Profiling & Frame Budget Optimization:** Extensive hands-on experience using GPU capture and profiling tools (RenderDoc, vendor GPU profilers, engine insights) to analyze draw calls, overdraw, state switches, texture bandwidth, and shader instruction counts—consistently hitting strict sub-11.1ms frame targets.
- **Lighting Strategy & Visual Pipeline Architecture:** Deep understanding of real-time global illumination, dynamic shadowing, LOD hierarchies, occlusion culling, and artist-friendly material graphs—empowering technical artists to push visual boundaries without compromising stability or performance.
- **Cross-Functional Pipeline Collaboration:** Proven track record partnering with environment artists, animators, and technical directors to establish clear performance budgets, resolve visual artifacts, and build reusable rendering utilities.

I am excited by Mob Entertainment's ambitious future and look forward to contributing to your next generation of visual storytelling and horror gameplay. Thank you for your time and consideration, and I welcome the chance to discuss how my graphics background aligns with your upcoming projects.

Sincerely,

Anniket Prajapati
