Anniket

Senior Unity & VR Developer | Game Designer | Gameplay Programmer

Lucknow, India (Remote Available) +91 80032 73794 anniket19121995@gmail.com

portfolio-web-pi-inky.vercel.app linkedin.com/in/anniket1912

Senior Unity & VR Developer with 3+ years of professional experience delivering **50+ Unity/VR applications** for US, UK, and German clients (INR 500k+ revenue, 4.9/5 rating). Specialist in **Meta Quest standalone VR optimization (maintaining 90+ FPS)** using XR Interaction Toolkit and Meta Quest SDK. Deep expertise in C# system architecture, real-time multiplayer networking (Photon, Mirror, WebSockets, custom TCP/UDP), physics-driven gameplay, and REST API integrations (including NASA NeoWs API).

CORE TECHNICAL COMPETENCIES

Engines & Languages: Unity Engine (Expert), C# (Expert), Unreal Engine (Advanced), C/C++, HLSL/Shader Graph

VR / XR Technologies: Meta Quest SDK, XR Interaction Toolkit, 6DOF Flight/Locomotion, Gesture Tracking, OVR Metrics

Multiplayer & Networking: Photon Fusion / PUN 2, Mirror, WebSockets, Custom TCP/UDP Sockets, Firebase Realtime DB

Optimization: 90+ FPS Standalone VR stability, Draw Call Batching, Object Pooling, GC Allocation minimization, Profiler/LODs

Design & Pipelines: Game Mechanics Design, Level Flow, Boss AI, Animation State Machines, Inverse Kinematics, Blender 3D (URP/HDRP)

Tools & Deployment: Git/GitHub, Android Studio, Xcode, Unity Cloud Build, CI/CD, Google Ads/Unity Monetization

PROFESSIONAL EXPERIENCE

Senior Unity & VR Developer — DanzerArt Studios / Global Freelance — Jun 2022 – Present | Remote

- Engineered and deployed **50+ Unity/VR applications** for international clients across US, UK, and Germany, maintaining a 4.9/5 satisfaction rating.
- Architected **35+ Meta Quest experiences** using XR Interaction Toolkit and Meta Quest SDK, consistently achieving **rock-solid 90+ FPS** on standalone mobile VR hardware.
- Engineered real-time multiplayer networking solutions utilizing **Photon Fusion, Mirror, WebSockets**, and low-latency TCP/UDP protocols for competitive and cooperative games.
- Collaborated with Doritos on *Crunch Dunk VR*, integrating physics-based gesture recognition and Firebase real-time leaderboards and user authentication.
- Integrated live **NASA NeoWs REST API** into *Earth Defender* to dynamically calculate real-world asteroid trajectories, collision physics, and planet defense systems.
- Designed complex gameplay loops: procedural IK archery (*David vs Goliath VR*), elemental magic spellcrafting (*Element Entropy VR*), and procedural level generation.

VR Game Developer — Fiverr Global Platform — 2022 | Freelance

- Built custom interactive VR mechanics (climbing, swimming, vehicular physics, shooting galleries) optimized for Oculus Quest 1 & 2.
- Implemented monetization models including rewarded video ads, interstitial ads, and banner ads via Google Ads / Unity Ads.

Graphic Designer & Team Lead — Whiteboard — Jun 2020 – May 2023 | Lucknow, India

- Led a creative team of 4 designers, directing game UI/UX concepts, iconography, HUD layouts, and visual marketing assets.
- Partnered with engineering teams to ensure UI/UX mockups adhered strictly to real-time rendering constraints and asset budgets.

FEATURED PROJECTS

SpaceWar VR & Battleground FPS VR: Full 6DOF flight combat simulator and multiplayer tactical shooter with Photon networking, weapon recoil, bullet physics, and lobby matchmaking.

Solar System Simulation VR: Immersive STEM educational experience simulating accurate planetary orbits, gravitational physics, and interactive spatial data.

Earth Defender: Data-driven 3D defense arcade game consuming NASA's live NeoWs API to generate real-time near-Earth asteroid hazard scenarios.

Stackmaster 3D & 7 2D Casual Titles: Production-ready mobile games featuring custom vehicle physics, raycast projectile mechanics, object pooling, and ad monetization pipelines.
